Web Technologies

Web Services Forum
Wednesday 21 April 2010
10:30am – 12:30am

Bronwyn Davies
Senior Project Officer
ITR – Web Services
What is Web 2.0?

- Firstly, what is Web 1.0?
  - Passive
  - One directional
  - Electronic magazine, journal, book

- Web 2.0
  - Interactive
  - Collaborative
  - Social

“Universities can no longer afford to sit back and do things the same way as they have in the past: to do so is to risk sliding into oblivion”

Professor Daryl Le Grew
Vice-Chancellor
University of Tasmania
Wesch, Michael, *A Vision of Students Today*,
http://www.youtube.com/watch?v=dGCJ46vyR9o, Accessed 29.4.09

a short video summarizing some of the most important characteristics of students today - how they learn, what they need to learn, their goals, hopes, dreams, what their lives will be like, and what kinds of changes they will experience in their lifetime. Created by Michael Wesch in collaboration with 200 students at Kansas State University.
How can Web 2.0 help?

- Connect students from anywhere 24/7
- Allow collaboration within and across faculties and institutions
- Engage today’s learners in ways that are ubiquitous to them
- Create future content from today’s classes / students
- Allow marking of process as well as product
Web Technologies

Welcome to the University of Tasmania web technologies website.

UTAS is piloting the use of blogs and wikis in line with a major objective of the Web Services Review to facilitate innovation and promote teaching & learning, research & community engagement.

If you would like to become part of this pilot project, please email webservices@utas.edu.au

If you have already been given a username and password for either a wiki or blog then please click on the appropriate link below.

Brendan Davies
Senior Project Officer
University Web Services
Responsibilities?

- UTAS Wikis
- UTAS Blogs
- Knowledge Base
- ePortfolios
- MyLO
- Social Media / Social Bookmarking
- iTunes U
- …
Current plans

- Individual approaches from UTAS teaching staff with sound pedagogical reason to use wiki &/or blog external to what is provided by MyLO

- Approaches from other areas of UTAS who need to collaborate or communicate with internal and external stakeholders (e.g. TIAR, Chinese Teachers, Lecture Theatre Design)

- Engaging with: Wikis, Blogs, ePortfolios, Twitter, Facebook, FlipHD, Smartpen
UTAS Wikis

Available now …

http://wikis.utas.edu.au

- Individuals or sections approach webservices@utas.edu.au requesting UTAS wiki for teaching and learning
- Approaches from other areas of UTAS who need to collaborate or communicate with internal and external stakeholders (e.g. TIAR, Chinese Teachers, Lecture Theatre Design)
- Training for academic staff in user of MyLO PowerLink and UTAS Wikis planned for early-mid June
Welcome to the Wiki space for the University of Tasmania.

To access a your UTAS Wiki, you will need to Log In.

There is also a "Log In" link in the top right-hand corner of this screen.

Please keep an eye on the Wiki Help & Hints space as further videos and guides will be added over time.

Online documentation can be found at http://confluence.utasian.com/display/LDC/Confluence+Documentation+Home

As a member of the University of Tasmania community, by using this Wiki you are agreeing to abide by all UTAS policies and procedures.

If you need assistance, please email: utas.wikis@utas.edu.au

Help & Hints

What is a Wiki?

A Wiki or wiki (pronounced "wicky" or "weekee") is a website (or other hypertext document collection) that allows a user to add content, as on an Internet forum, but also allows that content to be edited by any other user. ([Wikipedia](http://en.wikipedia.org/wiki/Wiki)

This wiki software "Confluence", a product supplied by [Atlassian](http://en.wikipedia.org/wiki/Wiki).

The video linked below is an overview of Wikis created by Lee Lefever from Commoncraft ([http://www.commoncraft.com/](http://www.commoncraft.com/)) and gives a great overview of what Wikis are.

There is a link below to a quick "getting started" video created for the Marine Biotelemetry student group. It may help a little.

More Help and Hints to Come

The UTAS wiki is in its infancy. Please watch this space as there will be more Help and Hints being added soon.
Marine Biotelemetry

Wiki home page of Marine Biotelemetry - KSA713

KSA713 is an elective unit in the Master of Antarctic Science at the University of Tasmania (UTAS). The Marine Biotelemetry unit covers aspects of acoustic, radio and satellite telemetry along with archival tag technology. Specific examples will be drawn from satellite tracking of marine mammals and birds in the Southern Ocean. Students will work at Tasmanian Aquaculture and Fisheries Institute (TAFI), UTAS, and in the field on the Tasman Peninsula. Field work will be conducted from beaches and in a 10 person boat. Students will predominantly work with two species, Banded morwicks and Seven gill sharks.

Master of Antarctic Science K7F

Marine Biotelemetry is one unit in the Master of Antarctic Science course. This course is a specialised, Masters by coursework program in polar marine biology.

The course was developed as part of the new International Antarctic Institute (IAI) and the UNESCO/Cousteau Ecotechnie Chair in Antarctic and Southern Ocean Environmental Sciences. The IAI is a multi-disciplinary consortium of international universities.

Students will develop an understanding of the roles the Southern Ocean and the Antarctic marine ecosystem play in the global climate system. It provides students with advanced instruction and training in emerging approaches and technologies in marine biology.
Mandatory Video

You are required to watch the following video as part of your assessment task. It is designed to help you learn how to edit your page, add attachments, links and tables and for your lecturers to make sure you understand the basics of using your wikispace.

![blip.tv]

Need Help?
If you need help with your wikispace please contact: Bronwyn.Davies@utas.edu.au

Hints:
A few things that aren't mentioned in the video ...

2. You should spell-check all your work. You can do this by typing the bulk of the text in Word, spell-checking it and then cutting and pasting it onto your wiki page
3. Don't use any fancy fonts - they will be automatically changed within the wiki anyway
4. Tables don't cut and paste very well - it might be better for you to create them within the wiki
5. Remember wiki is a Hawaiian word meaning quick or fast. A wiki is designed to allow you to create web pages quickly and easily, so it doesn't provide as many options as other programs such as Word, Excel or Dreamweaver for example.
Marine Biotelemetry Wiki

Comments (2)  Hide Comments  |  Collapse All  |  Add Comment

Geard says:

It would be 200% better if we could add attachments like Word doc's, Excel, PPT etc.

Edit  Remove  Reply

Bronwyn Davies says:

You can ... under the Tools menu in the top right hand corner just to the right of the Edit button, you can add any type of attachment you like. Size is limited to 2MB. Cheers Bron

Current Activities – UTAS Blogs

• MyLO will continue to be used for blogs related to Teaching and Learning

• UTAS Blogs are designed for regular information updates and can be linked to a page on a UTAS website.  E.g. Library Blog
UTAS Blogs

- Examples:

- RSS feeds
- Comments available
UTAS Blogs

UTAS now has Blogs!

Welcome to http://blogs.utas.edu.au. UTAS are trialling the use of Blogs and would like to hear from those of you who may be interested in participating.

Please contact Bronwyn.Davies@utas.edu.au for more information

Seriously good help – enrol in UniStart now – before census date!

March 3rd, 2010  Karman Pemberton  2 comments

“How will I find and interpret information at UTAS?”
“I’m now very confident about writing essays... where do I start?”
“How will I get everything done on time?”
Have you been asking yourself questions like this?
UniStart can help!

UniStart is a program designed to help you develop the skills you need to succeed at university. By enrolling in UniStart before census date, you will get access to online information and activities that will help you answer questions like these and more! To enquire about enrolment, please contact the Centre for the Advancement of Learning and Teaching on 03 6226 7251 or visit http://www.utas.edu.au/unistart to find out more.

[STW: Students who attended UniStart on campus already have access to this online material]

Highlight and Share the Web!

Diigo is a powerful research tool and a knowledge-sharing community

Research and Collaborate
- Don't just bookmark! Highlight the web! Add sticky notes too!
- Access and search your findings from any PC or iPhone!
- Create groups to pool resources for specific projects

Connect and Discover
- You are what you annotate, creating a presence for you in the community.
- Connect with friends effortlessly and non-intrusively through content.
- Discover quality resources on any subject or get personalized recommendations

Reading is more fun with friends, more productive with Diigo...
